

ArgoNet

YOUR COMPLETE VESSEL MONITORING SYSTEM

ARGOS
COLLECTE LOCALISATION SATELLITES

THE RELIABILITY OF THE

Argos SYSTEM

Use ArgoNet to

- Locate and track fishing vessels.
- Send messages ashore such as:
 - latest catch types and quantities,
 - information about fishing gear and entry into fishing zones,
 - other necessary information.

An operational system

- Installed in an hour, switched on in a second.
- Completely automatic.
- Data forwarded to fishing authorities and shipowners without extra cost.
- Several levels of protection: data encoding in the transmitter and passwords for the Argos data server to guarantee confidentiality.

Several thousand fishing vessels around the world are equipped with ArgoNet

On the Vessels

One transmitter,
two independent tracking systems:
Argos and GPS.

They send:

- one GPS position or more per hour,
- one or more catch report per day.

Handheld keypad
for sending messages

MAR GE - Argos transmitter

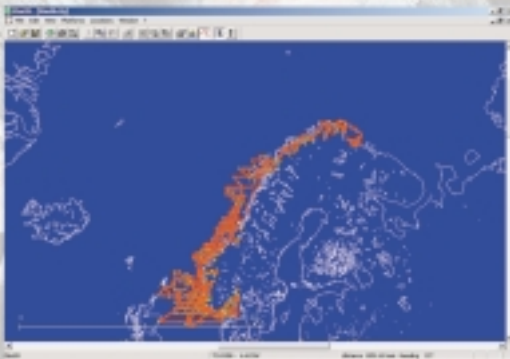

NOAA satellite

In your Office

The Elsa program displays:

- vessel name and ID,
- positions and routes on digitized maps,
- speed and heading,
- catch reports, messages and vessels inside or outside the Exclusive Economic Zones.

Elsa screen

ArgoNet features

- Officially approved by the leading fishing nations around the world (USA, Russia, Japan, Peru...).
- Worldwide Argos satellite coverage:
 - vessels can be located even in high latitudes and in narrow fjords.
- Continuity of Argos system guaranteed for the next 20 years.
- No maintenance required.
- The least expensive system on the market.
- The same transmitter reports positions from any ocean, with no configuration changes.

A **simple** WAY TO MEET

NATIONAL AND INTERNATIONAL FISHING REQUIREMENTS
